Elevator at Raymond

School Expenditures

Many inquiries have been made regarding the money spent for schools in this district. As a result the following figures have been compiled for your benefit. Estimates for the schools for 1928-29 are:

High School Salaries:	
Blackmore.....	\$2,200
Redd.....	1,900
Low.....	1,700
Mitchell.....	1,500
Christian.....	1,000
Total.....	8,300
Public School Salaries:	
Earl.....	\$1,900
Gibb.....	1,260
Ethridge.....	1,260
Laidlaw.....	1,260
Ethridge.....	1,200
Mann.....	1,170
Redd.....	1,260
Page.....	1,260
Duco.....	1,200
Meldrum.....	1,060
Nicholson.....	1,170
Snow.....	1,260
Winters.....	1,400
Total.....	\$16,660
Secretary-Treasurer.....	225
Total Salaries.....	\$25,185

Other Expenditures	
Debitures.....	\$2,213
Building.....	500
Heating Equipment.....	1,000
Grounds.....	100
Supplies.....	1,000
Fuel.....	1,200
Extra Equipment.....	900
Insurance.....	162
Van Service.....	400
Library.....	100
Extra Teacher.....	200
Miscellaneous.....	2,000
Extr High School Teacher.....	1,600
Total.....	\$11,375
Total Expenditures.....	\$36,560

Receipts	
School Grant.....	\$3,800
Poll Tax.....	500
Raymond 1st ward.....	500
Town Requisition.....	31,760
Total Receipts.....	\$36,560

The above totals seem very high but let us consider the matter from another angle. Suppose that you sent your children out of town for their high school education do you realize that it would cost at least \$500 per child per year to give them the same training they get here. And beside that is the fact that they would not be at home receiving the home training that is so essential to their development.

We say that school taxes is money well spent. And we urge parents to impress upon young people the importance of getting all their is out of their school work, for this is a day and age of specialists along every line and in order to compete with their fellow-men they must be in a position to say "I know", and then do.

NOTICE TO THRESHERMEN

Owners or operators of threshing machines and combined harvesters are required to send to the Department of Agriculture at the end of the threshing season a return showing the number of acres and number of bushel threshed. This applies whether the machine has been used for custom work or just for the owners crop. Special forms for these returns may be secured from:

The Publicity Branch
Department of Agriculture,
Edmonton.

Road Problems

Have you been over the road to Lethbridge toward Temple hill, and did you notice that a grader and a drag had been used the past week? Did you know that Mr. Len Christensen did the work at his own expense? And he figured that it would pay him to do it if he was the only man who used the road. Did you know that he used an engine for the job and demonstrated very clearly that such a method was practical? We take off our hat to Mr. Christensen for his good work and hope that the Municipality can see the point and will follow Mr. Christensen's example. Surely it isn't to the point where the farmer must build and keep up their own road.

We suggest that the board of trade good roads committee investigate the practicability of the Municipality purchasing a tractor grader for the coming year. Do you know that such an outfit can cover a distance of 30 miles in a 10-hour day. In a week 90 miles of road could be covered and every road touched up at least every month.

The gravel idea must not die out, for after all, we believe, this plan will come more nearly settling our road question once and for all. The gravel is there, and a 5 ton truck can haul it, and surely the roads need it. The old money question arises again, but why not sell the bonds the Municipality holds and turn the money into gravel on the roads, highways over which farmers could haul a load without breaking all the outfits they own.

It is true that taxes is high, but if we were assessed one mill for gravel on the roads we believe that we would more than make it back when it comes time to move the crop to market.

These are your roads, and it is your money being spent on them. Therefore it is your business to take an interest in the matter. What the majority wants will be what we will get. Let us hear from you by letter regarding the matter and we will publish it.

While motoring from Shelby last Friday night, on a visit to the new Capitol theatre here, George Brewerton and R. Denny, both of Shelby, narrowly escaped serious injury when their car was catapulted into the ditch by a barricade across the road, marking a new detour. Mr. Denny suffered several broken ribs, and Mr. Brewerton a number of minor injuries, while the car was almost totally ruined. A passing car brought the straddled travellers to Raymond, where they received medical attention.

Fred Lind purchased the first new Ford Truck sold by King Motors this season out of last week shipment.

Dick Wolfe just finished threshing his crop on the Kirkaldy ranch. He reports a yield of 98,000 bushels of oats, 1500 bushels of wheat and 2000 bushels of flax, on approximately 1,300 acres of land.

The Grading of Wheat

The heavy frosts which descended upon Western Canada during the third week of August, had a most disastrous effect upon a large portion of the wheat crop of the prairie provinces, with a resultant lowering in grades which, in the aggregate, means a loss of many millions of dollars to the farmer-producers of the west. Just how great the loss is will probably never be accurately known, but thousands of individual farmers will, more or less correctly, estimate what it means to them. Volume of production remains, the greatest in the history of the country, but grades, and consequently prices, are seriously affected.

Under the circumstances it is but natural that an outcry is raised against the whole system of grading, and some very rash statements are indulged in. The farmer who gets Number Three feels he ought to have received Number Two, and the man who is given Number Four contends he ought to have had Number Three, and so on down the line. This is but natural, but the result is that elevator operators, whether in the Pool or line elevators, are charged with taking advantage of the situation and grading too low. Governments, both federal and provincial, are held responsible for the system of grading in vogue, although, as a matter of fact, provincial governments have nothing to do with grading, which, as a matter of trade and commerce falls solely within the jurisdiction of the Dominion. If there was any truth in the charge that the Liberal Government, in Saskatchewan, is responsible for low grading this year, then the Farmer Governments in Manitoba and Alberta are equally responsible.

The truth of the matter is, of course, that neither Liberal, Conservative, Progressive nor United Farmer Governments are responsible. It may be that the present system of grading requires revision but even that cannot be determined offhand. Canadian wheat occupies an enviable reputation in the markets of the world, and because of that reputation commands a good price. That reputation is based on the quality of our wheat, and that quality is guaranteed through our system of uniform Government inspection and grading.

It may well be that in a year like the present, a relaxation in grading would result in a larger proportion of our wheat being placed in higher grades, and better prices received by the growers. On the other hand, a lowering in the standards might very easily result in a general lowering of all prices, so that the final result would be much the same.

But assuming that this did not happen this year, the undoubted effect would be injurious to the reputation of Canadian wheat and any gain derived this year would be more than offset in other years because of the poorer reputation for all our wheat that would result. The reputation of Canada's wheat abroad is the biggest asset we have in the British and European markets, and it must be retained at all hazards. And to tamper with grading solely in order to meet climatic conditions in any one year would be fatal to that reputation.

There is this, however, to be considered. Does frost, which mars the appearance of the wheat kernels, and results in lower grading, actually impair the milling qualities of that wheat, and the baking properties of the flour made from such wheat? In other words, does frost affect the real quality of the wheat to the extent that our present standards of grading would indicate? If it does not, then it would seem that our grading need not be quite so drastic without affecting the established reputation of our wheat.

This, however, is a question that can only be determined through study, research and experimentation. It cannot be decided in a day or two, or settled by legislative enactment. The Dominion Government is fully alive to the importance of this question, and the Government Laboratory, working in conjunction and full co-operation with all Western universities, is engaged in the task of ascertaining the actual facts and the full truth. In this important work the three provincial governments, the Wheat Pools, and the United Farmer organizations are all assisting.

Pending the result of such searching investigations, it is a mistake and unpatronizing for anybody to seek to influence public opinion out of an unfortunate condition resulting from the vagaries of the weather which no man, or body of men, can direct or control. Rather should every man and every organization having the best interests of Canada at heart do what lies in their power to assist in this great work to the end that all may benefit.

Want Tariff On Berries

B.C. Fruit Growers Want Seasonal Tariff On Importation From U.S.

A request for a reasonable tariff from May 15 until July 31, yearly, to apply on importations of United States strawberries to prairie points in advance of the arrival of British Columbia fruit was made by a delegation of Sanibel fruit growers in representations made to Hon. W. D. Euler, minister of national revenue, and Hon. Dr. J. H. King, minister

Mrs. L. Shephard Tells How Cuticura Healed Her Son

"My boy five years old had eczema on his thumbs. It broke out in a red rash and soon spread to his hands and arms. It itched terribly and he would scratch until his hands would bleed. He could not stand his clothing to touch his arms, and some nights he could not sleep on account of the irritation. The trouble lasted eight weeks. 'I began using Cuticura Soap and Ointment and they relieved the irritation. I continued the treatment and after using one cake of Cuticura Soap and one box of Cuticura Ointment he was healed.' (Signed) Mrs. Lorne Shephard, Wilkesport, Ont., Oct. 7, 1927.

Clear the pores of impurities by daily use of Cuticura Soap, with touches of Cuticura Ointment as needed to soothe and heal. Cuticura Talcum is fragrant and refreshing. A real toilet powder.

Sample Each Free by Mail. Address: Canadian Agents: "The B. O. Co., Montreal." Price, Soap 25c, Ointment 25c and 50c, Talcum 50c. Cuticura Shaving Stick 25c.

of health, in a conference at Victoria. Mr. Euler asked if it was the intention of the delegation to ask for a high tariff that would prohibit all buying.

They explained that the growers wished a reasonable tariff, not necessarily a high one, but one that would apply between the period of from May 15 to July 31.

The request was one that would require careful consideration and special legislation to bring into effect commented the minister, who promised to lay the matter before Hon. J. A. Robb, federal minister of finance, on his return to Ottawa.

For Women Senators

Reported That Government Will Facilitate Further Steps To Be Taken

The Ottawa Citizen says: "Those organizations which want the right of women to sit in the Senate affirmed, are to be facilitated in the further steps they propose to take. The facility will probably take the form of the Government paying the costs of both sides in an appeal to the privy council from a judgment of the supreme court of Canada declaring women ineligible for appointment to the Senate under the B.N.A. Act as it now stands."

Mistress: "And what's your baby's name, Mandy?"
Colored Maid: "Hallud. We named him from the Bible."
Mistress: "Hallud? I never heard that before."
Maid: "Oh, yes'm. Ain't yo' never read 'Hallud be thy name'?"

Nansen Believes Arctic Route Most Favorable

Explorer Planning Zeppelin Flight Between Europe and United States

A Zeppelin flight between Europe and the U.S. by way of the Arctic regions in order to determine the practicability of that route is now being actively prepared by a committee under the chairmanship of Fridtjof Nansen, noted polar explorer. It is believed that weather conditions will be more favorable in the Arctic than over the regular North Atlantic course.

The Zeppelin will be commanded by Captain Walter Bruns, secretary of the Society of Arctic Research. It is understood that the coming aeronautic convention in Berlin will fix the date for the Arctic flight, which probably will be next May or June.

Three Russian scientists, Prof. Wiese, meteorologist; Prof. Schmidt, biologist and Prof. Isatchenko, microbiologist were in Koenigsberg recently, en route to Berlin, and discussed plans for the expedition.

WEAK AND NERVOUS

A Condition Due To Watery Blood — Easily Corrected Through the Use Of Dr. Williams' Pink Pills.

Thin, pale girls lack the power of resistance to disease that rich, red blood gives. Nervous breakdown is the result of thin blood. So is indigestion, headaches, backaches and many other troubles. Girls suffering from thin, impure blood need just the help Dr. Williams' Pink Pills can give. For many years Dr. Williams' Pink Pills have been a world-famous blood-builder and nerve restorer. They actually make new, rich, red blood which imparts new vigor and life to all the organs of the body. Their first effect is usually shown by an improved appetite; then the spirits revive and restlessness at night gives way to health restoring sleep. For sufferers from anaemia, nervousness, general weakness or physical exhaustion Dr. Williams' Pink Pills are a restorative of the utmost value. This is proved by the experience of Miss Sarah A. McEachern, R.R. No. 3, Erie, N.S., who says: "About three years ago I became very weak and nervous. I had pains in my side and back. I also had frequent pains in the back of my head and neck. I was very pale and very weak. I had attacks of nervous irritability, and at times I was so nervous that life seemed hardly worth living. While in this condition a friend strongly advised me to take Dr. Williams' Pink Pills. I began taking these pills and used them for about two months with the result that there was such an improvement in my condition that friends would ask me what I was taking, and I was only too glad to tell them it was Dr. Williams' Pink Pills. I am now enjoying good health and am glad to give this statement for the benefit it may be to some other sufferer."

You can get these pills from any medicine dealer or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

End Season's Work

Freighters From Hudson Bay Return To Nova Scotia Ports

All freighters being used in Government work on Hudson Bay, have left for Nova Scotia ports for the winter months, according to wireless dispatches received at the Department of Marine. The tug Dainty and the steamers Canadian Voyager and Odile, left Port Churchill recently. The vessels have been used in carrying material to be used in the construction of the harbor.

Ready-made Medicine.—You need no physician for ordinary ills when you have at hand a bottle of Dr. Thomas' Electric Oil. For coughs, colds, sore throat, bronchial troubles, it is invaluable; for scalds, burns, bruises, sprains it is unsurpassed; while for cuts, sores and the like it is an unquestionable healer. It needs no testimonial other than the use, and that will satisfy anyone as to its effectiveness.

"What are you doing with that red lantern?" "Oh, I just found it. Some careless fellow left it beside a hole in the road."

Many mothers can testify to the virtue of Mother Graves' Worm Exterminator, because they know from experience how useful it is.

When Noah sailed the waters blue He had his troubles, same as you. For forty days he drove the Ark Before he found a place to park.

Rheumatism

A little Minard's rubbed into parts affected relieves rheumatic pain. Also good for bruises and sprains.

Proves Airship Practicable

Zeppelin's Flight Shows It Superior To Plane For Ocean Crossing, Says Expert

Captain Walter Bruns, noted aviation and Zeppelin expert, is of the opinion that the voyage of the Graf Zeppelin from Germany to the United States, has conclusively demonstrated the practicability of the airship for trans-ocean communication.

"Such a collection of bad weather as the Graf Zeppelin encountered," he said, "of course is not an everyday occurrence. In normal weather, the Zeppelin should span the ocean easily."

"From an expert viewpoint, it would be an interesting thing to have the worst weather imaginable, for it proved that the airship can do what the aeroplane cannot possibly do, go a long distance out of the way of a storm; or, if caught in it, merely drift until it blows over. The Graf Zeppelin was delayed in its arrival longer than expected. But what of it? Why apply different standards to an airship than to an ocean vessel. The big greyhounds recently have been from 23 to 36 hours late. Yet nobody has found fault with them."

"No airplane can afford to fly great distances to evade storms, because its fuel supply is too limited; also, it cannot have conveniences for weather observations which the gondola of an airship affords."

Asked whether he thought Dr. Eckener had possibly yielded to pressure and started at an inadvisable time, Captain Bruns replied: "I don't think so; on the contrary, Dr. Eckener undoubtedly said to himself, 'If I can only get the Zeppelin out of the hangar, I can fly in any kind of weather.'"

A Remarkable Invention

Metalophone Emits Noise When Detector Comes Near Metal

Metals are made to talk by a new invention, called the "Metalophone," which is being perfected by its discoverer, Mr. W. S. Clayton. This remarkable new instrument, which resembles a wireless receiving set, emits loud noises when the "detector," which is connected with it, comes near any metal.

The possible uses to which the "Metalophone" may be put, says the London Sunday News, are almost innumerable. It can be used to detect sunken submarines, ships, and even treasure at the bottom of the sea, and with a small set it is possible to detect the presence of a knife, revolver, bunch of keys or cigarette case in a person's pocket.

Although the invention is by no means fully developed, Mr. Clayton has already conducted some satisfactory experiments at sea off the coast of British Columbia. The instrument, carried on board a salvage steamer, detected the presence of some iron wreckage well below the surface of the water. Either earphones or a loud speaker can be used in connection with the invention.

An Oil Of Merit.—Dr. Thomas' Electric Oil, is not a jumble of medicinal substances thrown together and pushed by advertising, but the result of the careful investigation of the healing qualities of certain oils as applied to the human body. It is a rare combination and it won and kept public favor from the first. A trial of it will carry conviction to any who doubt its power to repair and heal.

Wonderful Future For Canada

Lord Peel Sees Great Things In Store For This Country

"We see developing here a vigorous and varied civilization, and we see a people growing with a clearly marked individuality of their own," said Lord Peel, grandson of England's Robert Peel and leader of the Empire Parliamentary Party, just before his departure for the Maritime Provinces. "We have fallen in love with this country and regret to leave these fertile plains and the bright stimulating air. We all foresee a wonderful future, even beyond the visions of the first pioneers. We believe the country is moving along right lines and it is only a matter of time until the ambitions of the most far-seeing are accomplished."

Minard's Liniment for aching joints.

Lindbergh Going To Turkey
Mrs. Evangeline Lindbergh, according to a dispatch sent by the Constantinople correspondent of the Egyptian Daily newspaper, Al-Han, has said that her famous son, Col. Charles A. Lindbergh, intends to visit her shortly in Turkey. The two will make an aerial journey to Syria and Jerusalem, to visit the holy places of Christianity.

Immigration for Canada from the United States this year is 25 per cent. greater than a year ago.

Masterpiece
CUT PLUG
SMOKING TOBACCO
IN PACKAGES AND 1/2 LB. TINS
A mixture of very fragrant and mild tobaccos

Children's COLDS Relieved Without "Dosing"

MOTHERS
the world over prefer the external treatment, Vicks VapoRub, because it avoids the constant "dosing" which so frequently disturbs delicate little stomachs. You just rub it on. Most colds yield by morning.

For free sample, write Vick Chemical Co., No. 4 Lee St., Greensboro, North Carolina, U. S. A.

Freedom From Insect Pests

Loss From Insects Has Been Very Light In Western Provinces

General freedom from insect pests in the western provinces is reported by the Dominion entomological branch, Grasshoppers which in former years worked havoc in the crops have been found scarce this year. The sugar beet crop in southern Alberta is stated to have suffered to some extent from the red-backed cutworm but the control campaign instituted by the department has localized the infestation. In the same province the alfalfa crop has been attacked by the Bertha army worm. Dusting of the crop is expected to eradicate the pest. Losses from insects are generally small, officials of the branch indicate.

Minard's Liniment—Popular for 50 years.

Lindendorff Is Worried
General Eric von Lindendorff, former quartermaster-general of the German army is reported to have appealed to President von Hindenburg for help against Free Mason lodges which he claims have "passed a death sentence upon me and my revelations of their peralicious methods."

Canada Supports League

Membership In League Of Nations Organization Is Growing

Thousands of active supporters of the League of Nations are now organized throughout Canada. According to the general secretary of the League of Nations, in Canada, the membership of the organization here has grown in three years from less than a thousand to almost fifteen thousand in number. Although strongly supported by women's organizations, more than half the members are business men—in British Columbia the male membership running to 85 per cent.

Health cannot be looked for in the child that is subject to worms, because worms destroy health by creating internal disturbances that retard development and cause serious weakness. Miller's Worm Powders expel worms and are so beneficial in their action that the systems of the little sufferers are restored to healthfulness, all the discomforts and dangers of worm infection are removed, and satisfactory growth is assured.

Senora Alice Cunha Machado was free on a writ of habeas corpus because the Supreme Court listened to her plea that her child did not deserve to be born in jail.

10 minutes ago—

How many people you know who end their colds with Aspirin! And how often you've heard of its prompt relief of sore throat or tonsillitis. No wonder millions take it for colds, neuralgia, rheumatism, and the aches and pains that go with them. The wonder is that anyone still worries through a winter without these tablets! They relieve quickly, yet have no effect whatever on the heart. Friends have often told you Aspirin is marvelous; doctors have declared it harmless. Every druggist has it, with proven directions. Why not put it to the test?

Aspirin is a Trademark Registered in Canada
ASPIRIN

Canada's Rise To Eminence As a Wheat Producing Country Makes a Fascinating Study

Canada's rise to eminence as a wheat-producing country forms by all odds the most far-reaching feature of the Dominion's economic advance during the present century, and the preliminary estimates of this year's production, as recently issued by various authorities, indicate that the 1928 crop will, in volume, surpass all previous records. While the final results may vary considerably from the best early estimates, the preliminary report of the Dominion Bureau of Statistics forecasts a wheat har-

vest amounting to roundly 550,000,000 bushels. The successive stages by which Canada has achieved its present immense volume of wheat production furnish one of the fascinating pictures of Canadian development. It is hard to realize that the wheat crop for the opening year of the twentieth century fell below 60,000,000 bushels and, that not until 1905 did the harvest for the first time reach 100,000,000 bushels. In the ten years following 1905 new records were reached

in almost every other year, culminating with the phenomenal crop of 1915. The 1915 harvest was literally a "wonder" crop, and established a new mark which stood as the record for a longer period than any other crop since the opening of the century. Finally, in 1922, the output of 1915 was exceeded, and in 1923 another heavy harvest set the record which held good for the following four years. Now, according to the best information, the 1928 crop has well exceeded the coveted figure of 500,000,000 bushels, and the Dominion has for the eleventh time since 1900 surpassed all previous high marks for wheat production.

From now on Canada can scarcely expect to establish new levels in wheat output as frequently as in the earlier years of the century, but it is assuring to know that the ultimate wheat-producing capacity of the Dominion, as estimated by the experts who have most carefully studied the country's land resources, is yet far from being attained.

An Old Welsh Legend

Story In Connection With Devil's Bridge Is Amusing
An amusing legend is told in connection with the Devil's Bridge at quaint old Aberystwyth, in Wales. The story is that Megan Llandunach was troubled one day to know how to bring her only cow across the chasm. The devil came along and offered to bridge the gorge if, in return, he might have the first living thing that crossed it. Megan agreed, and the devil expecting that Megan would be the first to pass, made the bridge. But Megan was foxy. Taking a piece of bread from her pocket, she threw it to the other side of the bridge and sent her dog after it. The devil took his defeat very sensibly and left his bridge there for future generations of the clever Welsh.

Favor Wool Contracts

Growers Of Alberta and Saskatchewan Plan Change in System Of Marketing
Following some conferences among representatives of the wool growers of Alberta and Southern Saskatchewan some rather radical changes in the system of marketing wool may evolve, the details of which are now being worked out. There has been considerable dissatisfaction for some years among the various wool growers' associations of Alberta and Saskatchewan due to the uncertainty of volume through these associations. During good seasons the growers sell to local buyers, getting advantage of prices which, it is contended are maintained through the activities of the Canadian Co-operative Wool Growers' Association. In bad seasons all the wool is dumped on the co-operative and the consistent supporters lose, it is claimed, through the spasmodic support given by the others. It is understood that the associations are planning some arrangement whereby they will only handle the wool of members signing contracts over a period of years.

Grain Elevators In Canada

Largest Terminal Elevator On the Continent Is Located At Port Arthur
There are 4,558 grain elevators in Canada with a total capacity of 284,818,200 bushels. Country elevators number 4,439 with a capacity of 146,639,200 bushels. Terminal, manufacturing, public and private elevators total 119 with an aggregate capacity of 138,179,000 bushels. All the country elevators, except two, are in the three prairie provinces—Manitoba, Saskatchewan and Alberta—where over 90 per cent. of the wheat crop and the larger percentage of other grains is grown. The terminal, manufacturing, public and private elevators are principally at Port Arthur, Fort William, Montreal, Vancouver and other ports at strategic points in different parts of the Dominion. The largest terminal elevator in North America is at Port Arthur, Ontario. It has a capacity of 6,900,000 bushels. It is owned and operated by the Saskatchewan Pool of the Canadian Wheat Producers Ltd., the largest farmers co-operative marketing organization in the world.

A Man's Good Friend

The dog-owner needs no music. His dog protects him. He can afford to take people on his dog's valuation. "Love my dog, love me." Best of all, the dog-owner is never lonely in his own house, for he knows that there is a welcome for him whenever he returns, and that if he chooses to sit down at once by the fire and read without worrying to give a full account of his day's experiences the dog will quite understand and settle contentedly at his side, knowing that the best sort of spiritual companionship requires no explanation.

Little Girl: Why are the chickens making such a noise, mummy?
Mother: They want their breakfast, dear.
Little Girl: Well, if they're so hungry why don't they lay themselves some eggs?

Improve Quality Of Poultry

Illustration Stations Promote Interest In Poultry Raising
The illustration stations operated under the direction of the Experimental Farms System in the prairie provinces and in British Columbia are helping very materially to arouse greater interest in the breeding, feeding and housing of poultry. In his report for last year, published by the Department of Agriculture, at Ottawa, the chief supervisor of these stations shows that each year improvements are being made by the various operators of the stations in the care and housing, and in the quality and care of the breeding stock. Some of the operators who permit parts of their farms to be used for these stations, have been building new up-to-date houses, while others are remodelling old ones in conformity with modern ideas with respect to lighting, ventilating, and general comfort. By careful breeding and selection the flocks are being improved in egg laying qualities. The stock they are able to produce are readily sold to farmers in the surrounding districts served by the stations. Last year there were distributed from the stations 602 cockerels, 682 pullets, and 1,528 settings of eggs from breeding stock that had produced more than two hundred eggs per year.

City Banker (visiting the farm)—"I suppose that's the hired man."
Farmer (who had visited banks)—"No, that's the first vice-president in charge of cows."

Pour boiling water over lemons before using them. This will double the amount of juice.

At the Christening of the Duchess of York

A charming photograph of H.R.H. the Duchess of York, taken upon her arrival at the Clyde with the Duke of York, to christen the newest of the Canadian Pacific Duchess liners. The Duke, speaking after the ceremony, said that the occasion was the first time a member of the Royal Family had sponsored a merchant vessel. The progress of Their Royal Highnesses through the yards was headlined in Britain as a "tour of cheers." The Duchess insisted on seeing everything

connected with the vessel herself, crawling under the keel and making a very thorough inspection. At luncheon after the launching, Sir George McLaren Brown, European general manager of the Canadian Pacific, presented her with a souvenir copy of a booklet showing pictures of the launches of the four Duchess steamships, including on the front page a photograph of the launch by Her Royal Highness of the vessel which carries her name.

Underlying Cause Of Canada's General Prosperity Due To Development of Agriculture

Of Interest To Hog Raisers

Tankage May Be Used As Skim Milk Substitute For Feeding Hogs
Hog raisers who cannot obtain skim milk for their stock, can find a satisfactory substitute in tankage which is a product of the abattoir. At the Lennoxville, Quebec, Experimental Station, four lots of hogs were fed to ascertain the value of tankage as compared with skim milk. With two lots, skim milk and tankage were compared with pigs from weaning to finishing for the market. The other two lots were fed skim milk to four and five months, and then finished on tankage. The cost of the feed did not vary greatly per pound of gain throughout the whole series, amounting from 6.93 cents per pound for the lot getting skim milk throughout the test, up to a little over 7 cents for the lot getting tankage throughout. This test is reviewed in the Report of the superintendent of the station for last year, in which he says that the lot which had meal and skim milk from weaning to finishing made the largest and cheapest gains. Those fed for five months on skim milk and finished on tankage came second, the pen getting skim milk for four months, and tankage of the balance of their lives, came third, while the lot fed tankage from weaning to finishing, were slightly below both in gains and in profit. This test shows that tankage is a very suitable substitute for skim milk when the latter feed is not available. The tankage used is designated "special 45 per cent. protein hog tankage." The meal mixture for the four lots for the first two months consisted of 2 parts oats, 1 part middlings, and 1 part shorts; for the second two months, 2 parts oats, 1 part middlings, 1 part shorts, and 1 part corn; and for the last six weeks, oats and corn constituted two parts each with one part each of middlings and shorts.

Will Ask For Protection

To Safeguard Producers Of Fruit, Vegetables and Poultry Against Foreign Dumping
Renewed representations for an amendment to the Canadian customs tariff act to safeguard producers of fruit, vegetables, poultry and eggs against foreign dumping will be made to the Dominion Government. Intimation of this move was made by F. L. Burrows, secretary of the Canadian council of horticulture, who has just concluded a trip across the Dominion in the interests of the industry. Mr. Burrows declared that under prevailing conditions the industry, especially in British Columbia and Eastern Canada, was confronted by seasonal competition by way of "wholesale dumping" from the United States.

Oak Imported By Britain

Small Percentage Is Supplied Within Empire Itself
Most of us regard the oak as emblematic of Britain and the British nation. It, therefore, comes as something of a surprise to learn from the latest report of the Imperial Economic Committee on Forest Products, that Great Britain spends more than £2,000,000 a year on importing oak, and that less than 1 per cent. of the supply comes from the Empire itself, while 75 per cent. is sent here from the United States. It is even more astonishing when it is realized that the tree itself does not grow in America and that she gets her supply from British Honduras.

Consider the Horse

Why drivers of wagons and horse-drawn vehicles insist on neglecting to put lights on their conveyances after dark is a mystery. True, a few do carry lights, but a great many do not. If the person driving does not think of his own safety, he should at least consider the horse. An adequate light costs little, and may easily be the means of preventing a fatality.

Would Make It a Dozen

Zavo Agha, who says he is 155 years old, is seeking his twelfth wife. Unlike most individuals who have been married a number of times he has never been divorced. "I am an affectionate, faithful and non-quarrelling husband," he said. "Each of my previous 11 wives died of happy old age."

Failure is a kind of automatic thread cutter on the human sewing machine.

Every year the Dominion Government votes the sum of seven million dollars in aid of agriculture. Care is taken to expend it in the most economical way possible to meet the demands of the industry, demands which cannot rightly be met by any other organization, this annual expenditure representing about 41 per cent. of the gross agricultural revenue. In other words, the cost of administering the Dominion Department of Agriculture is approximately 41 for every \$1,000 of gross revenue. Based on the gross agricultural wealth of the country in 1927, the Government expenditure amounts to .08 per cent., or \$8 for every \$10,000 of our agricultural wealth. No one conversant with the importance of agriculture to Canada questions the propriety of Parliament voting this annual grant in aid. But far too many people do not understand how great is this importance of agriculture, and still less are they aware of the actual value of the work conducted by the Dominion Department.

Agricultural returns are the barometer of Canada's national prosperity. This is generally recognized by those who have the wider vision; those who realize that the rise and fall of business generally is due largely to one main factor—the crops. Weather conditions, crop reports, crop estimates and, in fact, everything pertaining to crops are closely followed by the leaders of our industrial enterprises, as closely, indeed, as they are by the farmers themselves. Canada has had many problems in connection with her agriculture that have been peculiarly and particularly her own. She has solved many, and an army of workers under the direction of the Dominion Department is working night and day to solve more and more of them. Those who are responsible for the directing of these workers are probably, the only people who fully realize the enormity of the task.

The Dominion Department of Agriculture is made up of eight branches viz.: The Experimental Farms; Dairy and Cold Storage; Health of Animals; Live Stock; Seed; Entomological; Fruit and Publications. These are the main divisions with, in addition, the seventeen hundred projects under investigation at Experimental Farm. The responsible heads administer the numerous regulations under the following Acts of Parliament: Animal Contagious Diseases; Cold Storage; Dairy; Dairy Produce; Feeding Stuffs; Fertilizers; Fruit; Live Stock and Live Stock Products; Hay and Straw; Meat and Canned Foods; Root Vegetables, and Seeds. Promotion work covers a very wide field, and to those carrying on this work may be given the credit for the development of co-operative marketing. By this means, together with the standardization of products, Canada has been enabled to compete successfully in the open world markets.

That the experimental and investigational work carried on by the Department has literally made Canadian agriculture is not putting the case too strongly. It has resulted in the extension of our northern agricultural boundary, enabled farmers to grow crops in certain districts where crops never grew before, increased the yields, controlled destructive pests, and, in short, has made agriculture the industry that is and must ever be the bedrock of the national prosperity. All classes benefit from the wealth drawn from the soil, and the underlying cause of Canada's general progress and prosperity is the satisfactory condition of her agriculture. This condition, too, the Dominion Department is at all times striving further to develop and improve.

To a Jewish ex-serviceman an acquaintance remarked: "So you were in the army, Ike?"
"Oh, I was in the army," was the proud response.
"Did you get a commission?"
"No; only my wages!"

"He is looking closely at my Farm-yard Scene. Is he a critic or an estate owner?" —Megendorfer Blatter, Munich.

South African Pleased With Canadian Farms

Believes Dominion Offers Better Opportunities Than Other Countries

"Taking the British harvesters' scheme as it affects me personally, I vote it a success," declared Geoffrey Harris Mitchell, who was in Winnipeg, on his way back to South Africa after six weeks' experience as a harvester in the district near Brandon, Man. "I wish to state right here," he said, "that I am absolutely satisfied with the treatment I received from the various farmers I worked for, and that the food provided me in all cases was really excellent and that the general conditions of farm life, at a time when every household was of a necessity overtaxed, compared decidedly favorably with farm conditions I have experienced in South Africa."

Referring to the complaint of other British harvesters, Mr. Mitchell said that they may not have been so fortunate, some of them, in choice of territory and work as he was, but at the same time most of the men had exactly the same chances he had. "In the district I was in," he stated, "I can vouch that there was an actual shortage of harvest help, many farmers leaving portions of their crop lying on the ground unstocked simply because they were unable to procure the necessary labor."

In reply to the question "Why are so many of the British harvesters returning home?" was that many of them were simply homesick and had been ever since they lost sight of England. "Perhaps this is not so hard to understand when one takes into consideration the fact that many of these men have spent few night away from their homes during their whole life up to now." There was, too, the inevitable percentage of "wont works" backed up by agitators.

"How do you like being married?"
"Awful. I am not allowed to smoke, drink or go out at night."
"You must get very bored."
"I am not allowed to do that either." —Vikings, Oslo.

Chinese Buy Many Records

Phonograph Market In Hong Kong Absorbs Thousands Every Year

The growing popularity of dancing among the Chinese has resulted in an increased demand for English and American phonograph records, Perry N. Jister, United States Vice-Consul at Hong Kong, informs the Department of Commerce.

Jister estimates that the phonograph market in Hong Kong will absorb from 250,000 to 275,000 records a year, of which about 30,000 will be records in the English language or with Occidental music. The larger stores carry stocks of from 6,000 to 8,000 pieces at a time, he says.

Sounds Logical

"Mother," she began, "what does trans-Atlantic mean?"
"Across the ocean," replied the mother.
"Then, does 'trans' always mean across?"
"Yes, it does, always." And the mother added sternly, "If you ask another question tonight, I shall send you to bed."

The second silence lasted about three minutes. It was broken at last by a plaintive, small voice which commented, "Then I suppose transparent means a cross parent!"

Inquisitive Kiddy: What's a dachshund, Dad?
Dad: A 1-storey dog with Charles-ton legs. Now go to bed.

When a man's business runs down the sheriff comes along and winds it up.

WORLD HAPPENINGS BRIEFLY TOLD

Choked by a piece of carrot which lodged in his throat, John William Black, of Ogdensburg, N.Y., died in hospital at Prescott, Ont.

E. W. Beatty, president of the Canadian Pacific Railway, recently celebrated his 51st birthday. Mr. Beatty was born in Thorold, Ont., on October 16, 1877.

Using nitro-glycerine, yeggmen blew open the safe in the post office and store operated by M. S. Schroeder, at Walsh, Alta., and got away with about \$5,000 in cash.

Lord Eirkenhead, secretary of state for India since 1924, has resigned from the Baldwin cabinet in order to follow commercial activities in London.

A trainload of 1,500 head of cattle owned by a group of ranchers from the Peace country, reached Edmonton recently over the Edmonton, Dunvegan and British Columbia Railway.

A guarantee of tonnage, such as was given by the Flin Flon interests, is essential before a branch line is built to the Sherritt-Gordon mine, in northern Manitoba, said Major Graham Bell, deputy minister of railways, in commenting on the project.

Lieut.-Col. A. L. Young, of Souris, Man., officer commanding the second reserve regiment, 12th Manitoba Dragoons, was elected president of the Canadian Cavalry Association for the incoming year at the concluding session of the 13th annual convention at St. John, N.B.

Whether the wheat pools of the west are liable to income taxation will be the subject of a big case in the exchequer court this fall. The matter has long been in dispute, and while the tax has been paid, it has been under dispute. The Saskatchewan Co-operative Company's case is to be made a test, the decision in which will apply to the other pools, says the Ottawa Citizen.

Medical Examination Of Settlers

Doctors To Be Appointed To Examine Intending Settlers At Point Of Origin

Arrangements are being made by the department of immigration to appoint approximately 500 doctors who will conduct examinations on intending settlers at the point of origin, thus eliminating any possibility of hardship in a settler presenting himself at seaboard and being turned down by the doctors at the ports, declared Hon. Robert Forke, minister of immigration, who had a conference with provincial officials on the question of immigration at Edmonton.

Japan's Traffic Problem

Traffic congestion has become so bad in the streets of Osaka, Japan, that officials are contemplating use of the old canals. It is proposed to use boats propelled by outboard motors as a part of the municipal transportation system.

Just a tasteless dose of Phillips' Milk of Magnesia in water. That is an alkali, effective, yet harmless. It has been the standard antacid for 50 years among physicians everywhere. Singapore's Huge Floating Dock

First Portion Has Completed Eight Thousand Mile Journey

After a four months' voyage from England, the first portion of the huge floating dock for the new British naval base at Singapore, having completed a journey of 8,000 miles by way of the Suez Canal.

The Singapore dock, when completed, will be the largest floating dry dock in the world and large enough to hold any British warship, weighs 50,000 tons and contains 20,000 tons of steel. It cost \$60,000,000.

The contract for completing the dockyard was awarded on September 27, and called for the finishing of the work by 1935. It is estimated that the naval part of the project will cost \$37,500,000.

NEW BEAUTY BY YOUR CLOTHES

You can look attractive and stylish on less. Learn how to give new beauty and variety to your dresses and add individuality and charm to things around the home by the quick magic of tinting and dyeing. Perfect results are possible only with Diamond Dyes. Each package represents the perfection of 50 years of dye-making. They never streak, spot or run. They are real dyes, like those used when the cloth was made.

Diamond Dyes are easy to use. The "know-how" is in the dyes. Fashionable tints appear like magic right over the out-of-style or faded colors. Insist on Diamond Dyes and save disappointment.

"Color Craft," my big new book of dollar-saving hints, will be sent you FREE. Write Mae Martin, Diamond Dyes, Windsor, Ontario.

Soundings Will Be Continued In Spring

Progress Made In Survey Work On Great Slave Lake

Soundings of Great Slave Lake as an aid to navigation will be continued as soon as spring opens, according to H. L. Leadman, engineer of the hydrographic survey branch of the federal department of marine, who recently arrived at Edmonton from the far north. He has been in charge of operations in the vicinity of Fort Resolution during the past season, assisted by W. R. Young, of Winnipeg, and a crew of four men.

Commercial fishing offers great possibilities on Great Slave Lake, says Mr. Leadman, but he thinks that mining will also be necessary to support a population of any size. He also looks forward to considerable mining activity, and states that aeroplanes carrying prospectors were often seen to pass over on the way down the Mackenzie River. With the providing of additional transportation for that country, he felt certain of a period of market expansion.

Millions Invested In Cars

Seventy-One Million Dollars Invested In Cars In Saskatchewan

Over \$71,000,000 has been invested in automobiles by the people of Saskatchewan. According to the Public Service monthly, in 1928, for the eight month period a total of 113,694 cars was licensed by the department. In subdivisions these were: Automobiles, 99,501; livery cars, 835; trucks, 13,358.

Figuring one class of car at a valuation of \$600 each and the rest at only \$1,000 each, on the 1927 total of 104,909 motor vehicles licensed, this meant a grand total considerably in excess of \$71,000,000 invested by the people of Saskatchewan.

About 350,000 Londoners, of whom nearly 280,000 are women, are employed in hotels, restaurants and domestic service.

Many of Canada's leading social and sporting clubs use Red Rose Orange Pekoe Tea exclusively. The added strength and inimitable flavor of Red Rose Orange Pekoe make it last longer, go farther and taste better. Packed in damp-proof aluminum.

New Horse Class For Royal

Shows Canada Is Still Interested In Horse-Breeding

Interest in horse-breeding is holding its own in Canada, in spite of the competition from mechanical transport, if one may judge by new classes added to the horse section at the Royal Winter Fair this year. In addition to the regular classes for Clydesdales, Percherons, Belgians, Shires, Standard Breds, Thoroughbreds, Hackneys, French-Canadians, Half-Bred Hunters or Saddle horses, and the draught horse and pony classes, a new class has been added for Suffolk, the well-known British heavy horse breed. As good light horses, suitable for hunters, saddle horses and army remounts, are in keen demand, a class has been added for mares suitable as brood mares in the production of this type of horse. This class is open to mares, four years and over, owned in Canada and vouched as being registered in the Canadian Hunter, Saddle and Light Horse Improvement Society. The mares will be judged on the basis of their qualification to produce high hunters, saddle horses and army remounts. The sections of this class are for heavy weight mares, 1,250 pounds and over; middle weight mares, 1,150 pounds and under 1,250; and lightweight mares, 1,050 pounds and under 1,150.

Winnipeg Newspaper Union

Flattering Neckline

The chic femininity of the mode is smartly expressed in simple dress of printed sheer velvet in combination with georgette crepe. The long-waisted bodice showing dip-in-the-front, combines with shirred upper edge of skirt, to create the desired flat neckline. The shaped collar of Vionnet effect, is flattering new fashion, and is made of georgette crepe, which is also used for tiered flounces of long tight-fitting sleeves. Style No. 289 can be had in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust. It is dainty in georgette crepe, crepe Elizabeth, crepe Roma or sheer plain velvet for afternoons. Crepe satin, canton-faille crepe, wool crepe and crepe de chine are excellent fabrics to choose for serviceable wear. Pattern price 25 cents, in stamps or coin (coin preferred). Wrap coin carefully.

W. A. BLACK.

Director, Canadian Pacific Railway. William Allan Black, Director of the Canadian Pacific Railway, and President of the Ogilvie Flour Mills, was born in Montreal in 1862, the son of Charles R. Black, and was educated in Montreal Public Schools. He was with the traffic department of the Grand Trunk Railway from 1879 to 1882, in Montreal, and with the traffic department of the Canadian Pacific Railway in Winnipeg, from 1882 to 1884, at which latter date he joined the Ogilvie Flour Mills. In 1887 he was appointed Secretary, in 1902, General Manager of Western division, in 1910 he was elected director, and in 1911 General Manager of the entire corporation, and the following year Vice-President and Managing Director. He has since succeeded the late Mr. C. R. Hosmer as President. He was President of the Montreal Board of Trade during 1918-19.

Recipes For This Week

(By Betty Barclay)

ECONOMICAL PUDDING

2 cups milk.
1/4 teaspoon salt.
1 teaspoon vanilla.
2 tablespoons rice.
1/4 cup sugar.
1 cup raisins.

Wash rice thoroughly and drain; place in a huttered pudding dish and pour in milk. Bake in a slow oven for about 1 1/2 hours, stirring occasionally; add remaining ingredients and bake from 1/2 to 1 hour without stirring.

UNUSUAL SWEET PICKLE

4 oranges.
2 cups sugar.
1 1/2 cups vinegar.
1 teaspoon cloves.
1 teaspoon stick cinnamon.

Peel oranges, removing all white membrane with peel; cut into thick slices; steam until tender and translucent. Boil sugar, vinegar and spices, tied in cheesecloth, for twenty-five minutes. Add fruit, and put in fireless cooker, or simmer slowly, on back of stove, for one hour. Place in glass jar, and let stand a week or two to ripen, before using.

Practicability Of Thrift

True thrift is not a theory; it is actuality. It is a principle that is applied constantly in the practical problems of life. It brings immediate results. One dollar saved is an actual, not theoretical, step forward.

It is never too late to learn; never too late to seek knowledge. One of the finest epitaphs ever placed on a tombstone was that placed over the grave of John Richard Green, the famous historian. It said "He Died Learning."

The wife: "This paper says that in parts of the East a good wife costs fifteen shillings. Disgraceful!" Her Hubby: "Well, a good wife is worth fifteen shillings, isn't she?"

BABY GIRL HAD DIARRHOEA WHEN CUTTING TEETH

Mrs. A. J. Murray, Gull Lake, Sask., writes:—"Last summer, my baby girl was cutting teeth and became very weak with the effects of diarrhoea. I didn't know just what to do for her as she couldn't retain anything. At last one of my neighbors said to me, 'Haven't you any

why, I wouldn't be without it where there are children."

"My husband went to town and got a bottle, and the very first dose helped her wonderfully, and in three days she was well over the diarrhoea and was running around as well as ever."

SUNDAY SCHOOL LESSON

OCTOBER 28

PAUL'S LAST JOURNEY TO JERUSALEM

Golden Text: "Remember the words of the Lord Jesus, that He Himself said, 'It is more blessed to give than to receive.'"—Acts 20:35.

Lesson: Acts 20:1-21:17; 2 Corinthians 11:28.

Devotional Reading: John 10:7-17.

Explanations and Comments

Paul Reviews His Ministry Among the Ephesians, Acts 20:17-21.—Paul had sailed past Ephesus, for he could not take the time to stop there or elsewhere in the province of Asia, as he was very desirous of being in Jerusalem for the day of Pentecost. But when he reached Miletus he sent a messenger to the elders (or presbyters, Revised Version) at Ephesus, bidding them come to Miletus to say farewell. In the churches he founded Paul had established the offices of deacons and elders after the model of the Jewish synagogue. Paul speaks sometimes of elders and sometimes of bishops using the latter term, which means literally overseers, or superintendents, in churches where there was a large Gentile element.

"Ye yourselves know, from the first day that I set foot in Asia, after what manner I was with you all the time"—thus Paul began his address to the Ephesian elders upon their arrival. The first day that Paul set foot in Asia is recorded in Acts 16:7, but his first preaching there was later, Acts 18:19. He came to Ephesus again on his last missionary journey, Acts 19. "The manner of his life" he proceeds to tell in the next three verses.

Paul first reminded them how faithfully and how humbly he had served the Lord while his heart was filled with anxiety for them and his own life was threatened by the plots of the Jews (see 1 Cor. 15:32; 2 Cor. 1:8-10); and how he had told them all things profitable for them to know, and had taught them in public and in private the essentials of religion, repentance toward God and faith toward Christ. Fear of giving offence to the Jews and therefore of endangering his own life had not prevented him from preaching a crucified Christ and the gospel for Gentiles as well as for Jews.

"Repentance toward God and faith toward our Lord Jesus Christ": there is no other way but by repentance and faith. First, realize your sins; second, confess to Jesus Christ; and third, live as you think you ought to live.

Nothing Else But

A well-known comedian is very proud of his three beautiful and talented daughters.

One day an acquaintance and admirer of the comedian was talking to him about the family.

"A funny thing," he remarked, "you have nothing but those three girls."

The comedian looked at his friend in astonishment.

"Nothing but girls!" he echoed.

"Why, my dear old chap, I wish you were right. As it is, we've nothing but boys all over the place."

Static Forerunner Of Storm

There is a relationship between static and storms. . . . There are storms, it is true, that are accompanied by little or no static. There are other storms, accompanied by static, which are nevertheless difficult to locate because the static appears to come from no definite direction. But as a rule static accompanies a storm and gives in advance of the arrival of the storm definite indication of the direction of approach.

A Remarkable Magnet

Steel Alloy Raises Thirty Times Its Own Weight

A new steel alloy possessing remarkable powers of magnetization has been discovered by a research engineer. It is cobalt steel alloyed with tungsten, and in the form of a horseshoe magnet it is claimed that it will raise a bar thirty times its own weight. Spectators at a recent demonstration were amazed to see a bar of alloy floating in the air. The explanation lay in a similar bar placed beneath the floating one. Magnetized with the poles opposite, the two bars were kept apart by the magnetic repulsion between them and as the repulsion was greater than the force of gravity, the upper bar floated.

Canadian Nickel Control Seen As Peace Move On Part Of Britain

Toronto.—The Mail and Empire publishes the following article:

"Canadian control of International Nickel gained by a spectacular battle on the stock exchange of Toronto, Montreal and New York, is but a part of Great Britain's policy to ensure world peace by dominating the source of supply of one of the essential implements of war. While the public watched the sensational rise of Nickel on the money markets, the significant move back of it, all the significant move back of it all was a British fight for peace, and the results will be world-wide.

"The International-Mond negotiations are still in progress, according to New York authorities, with a likelihood that the deal will be completed this week.

"The skirmish in the world's drama of peace was fought out on the money markets. It has been under way for several months, but all the public saw of it was the gradual rise of Nickel and last week's fireworks.

"The general story which has gained credence in New York is that it all began nearly two years ago when the British chemical commission made its report to the British government. Sir Alfred Mond, now Lord Melchett, was chairman of the commission. Two points of marked significance to the British Empire and to the peace of the world were indicated by the commissioners."

Wins Mayoralty Contest

W. H. Malkin Is Elected Mayor Of Greater Vancouver

Vancouver.—With a majority of 1,666 votes, W. H. Malkin, pioneer wholesale merchant, was elected first mayor of the amalgamated city of Greater Vancouver, comprising Vancouver City, Point Grey, and South Vancouver municipalities, in the civic elections. Mr. Malkin defeated Mayor Louis D. Taylor, six years chief magistrate of Vancouver.

The vote in the thirty-nine polls was: Malkin, 18,733; Taylor, 17,067.

Louis Rubinowitz, another mayoralty candidate was never a factor in the contest. He polled but 207 votes. Mr. Malkin's term of office will be two years.

Memorial Day For Celebrated Explorer

Norwegian Government Will Honor Memory Of Roald Amundsen

Oslo, Norway.—The anniversary of the discovery of the South Pole by Roald Amundsen, in 1911, will be celebrated on December 14, by the Norwegian government as a memorial day for the famous explorer who died in an effort to bring relief to the lost expedition of General Nobile.

Besides the extensive celebration in Norway, Norwegians all over the world will be informed of their government's decision to enable them arrange other commemoratives.

C.P.R. Head Celebrates Birthday

Montreal.—E. W. Beatty, president of the Canadian Pacific Railway, has celebrated his 51st birthday. Mr. Beatty was born in Thorold, Ont., on October 16, 1877. He entered the service of the company of which he is now chairman and president in 1901, as assistant to the general counsel. In 1914, he became vice-president, and in 1918, president, succeeding to the post made vacant by the death of Lord Shaugnessy.

Graceful Tribute Is Paid To Canada By U. S. Speaker

New York.—"The country in which you were born is rapidly coming of age; you have no reason to be ashamed of it, and it considers you its liaison officers in the great country of your adoption." These were the closing words addressed by the Hon. Justice E. Fabre Surveyor to the semi-annual gathering of the Canadian Society in New York recently.

Justice Surveyor spoke to a distinguished group which included Sir John Gloster Armstrong, British consul general at New York, and Mr. Frederick Hudd, the Canadian trade commissioner here. His address was

Heroism At Sea

Harrowing Tale Of Fire Aboard Ship Is Related

Vancouver.—With seven of her crew painfully burned and scalded, the Blue Star Line steamship, "Trojan Star," Capt. G. A. Griffiths, arrived here with a harrowing story of fire on board while the vessel was off the California coast on the night of October 12.

William P. Tension, Hull, Eng., fireman aboard the ship, was burned to death and his body buried at sea.

The fire broke out at 6.20 p.m., October 12, when an oil jet burst in the stokehold, trapping eight men of the engine room force in a wall of flame that sprang up in an instant.

Second Engineer Sydney P. Houston and Fireman James, according to the ship's officers, were chiefly responsible for the safety of the engine room crew.

Seeing that the way to safety on deck was barred, Houston led the men into the bilges under the boiler. The flames roared above them and for three hours and thirty minutes they lay there in oil and water with the plates growing hotter and the water in which they lay steadily approaching the boiling point. James, by his cheery conduct and singing of songs, aided his comrades while awaiting rescue. Tension went temporarily insane from the heat and rushed back to the engine room again, where he succumbed.

Only an act of providence stopped the flames. A big steam pipe in the stokehold burst, pouring a dense cloud of steam into the compartment, finally smothering the fire and permitting the deck crew to reach the imprisoned engine room crew, who were smeared from head to foot with fuel oil, soaked in water, blistered and partly gassed.

They are all recovering.

Radio Station Opened

Canada's Largest Broadcasting Station Operating At Winnipeg

Winnipeg, Man.—Official opening of the new broadcasting station of the Manitoba Telephone System, the largest in Canada, took place at the Sherbrooke street studio.

Hon. W. R. Clubb, Minister of Telephones, pressed a button which immediately set in operation the big 5,000-20,000 watt transmitter situated at the Agricultural College, eight miles distant.

The power of the new station is more than twenty times that of the old plant.

The program included an address by Premier John Bracken and a band concert by the Winnipeg Salvation Army Citadel Band, under the direction of Bandmaster H. G. Merritt. The official wave length of the station will be 384.4 metres and 200 kilo cycles.

Typhus In the Ukraine

London, Eng.—An Exchange Telegraph despatch from Riga reported 10,000 cases of typhus in the Ukraine with many deaths. Schools and moving picture houses were closed. Provisions and medicine were needed urgently, the despatch said.

Air Phones A Success

London, Eng.—The Cross Channel Air Company announces that successful experiments had been made whereby passengers called their city business houses by wireless telephone while flying as high as 12,000 feet.

TO ENCOURAGE SETTLEMENT

J. N. K. MACALISTER

Assistant Commissioner, Department of Colonization and Development, Canadian Pacific Railway, who says that the newly organized Colonization Finance Corporation of Canada Limited is the most important step ever taken jointly by Canadian private land-owning bodies in the effort to encourage agricultural settlement on a sound basis. Millions of acres are involved and the scheme is being developed in conjunction with the Canada Colonization Association, of which Mr. Macalister is a director.

Workman Buried In Concrete

Two Men Victims Of Accident At Cleveland

Cleveland, Ohio.—The bodies of two workmen who were buried alive in a 105 foot hole under a fifty ton fall of fresh cement at the Union Depot site here, were cut from the hardened mixture after a desperate 12-hour struggle.

The two men were Patrick Toolis, 29, and Patrick Cleary, 27, both of Cleveland.

Toolis and Cleary were working at the bottom of the hole in which concrete was to be poured. A few feet away was another pit into which concrete had been poured a short time before.

Under the pressure of the tons of concrete, the retaining walls of the second gave way. The concrete tore through four feet of earth and poured down upon the two victims.

Carried Record Load

Italian Steamer Sails With 565,000 Bushels Of Mixed Grains

Montreal.—Over half a million bushels of grain, the largest cargo of this commodity ever to leave the port of Montreal on any one ship, was loaded on the S.S. Emmanuel Accarie, an Italian steamer, which cleared for Genoa with 565,000 bushels. This shipment consisted of twelve different types and grades of grain, American oats predominating, though a large amount of wheat and a fair quantity of barley also were placed aboard.

HIGH COMMISSIONER FROM BRITAIN

This photographic portrait of Sir William Clark, first high commissioner from Great Britain to Canada who arrived recently at Ottawa, was made this summer in London, by Minna Keene, Fellow of the Royal Photographic Society. Mrs. Keene, who lives in Oakville, has done photographic portraits of many distinguished people in America, Europe and Africa, and has also made photographic studies of national types in many parts of the world.

Saskatchewan Feeder Show

Alberta Wins Grand Championship For Carload Of Steers

Moose Jaw.—C. E. Archer, Manyberries, Alberta, duplicated his achievement of last year, when he won the grand champion carload of steers award in the Saskatchewan Feeder Show held here. Saskatchewan gained both of the other premier awards of the show when Lloyd Bloomfield, Rockglen, won the reserve champion carload award, and J. Harkness, Kilsby, won the grand championship for a group of five steers.

Mr. Archer gained his award with a group of two-year-old steers, and Mr. Bloomfield with a group of yearlings. Mr. Harkness's exhibit was a two-year-old group of five.

An outstanding feature was the sale of sheep. The high prices at which the lambs were selling was indicated when the groups of fifteen lambs went under the hammer. Last year the highest price gained in this class of feeder was 11 cents, whereas the highest this year was 13 and one quarter cents, an increase of two and a quarter cents over last year.

New Daily For The Pas

Expect Publication Will Start Early In December

Calgary.—It is expected that the Northern Star, the proposed new daily for The Pas, for which a Canadian Press franchise has been granted, will commence publication early in December. A building is now in course of construction there to house the editorial, business and printing departments. G. M. Bell, president of the Calgary Albertan Company, is president of the new company, which has been formed to undertake the enterprise, and S. L. Cross, Regina, is vice-president. Associated with them will be P. C. Galbraith, at present news editor of the Winnipeg Tribune, as business manager, and Fred Johnson, mining editor of the Winnipeg Tribune, as managing editor.

Arms Plea a Failure

German Communists Did Not Secure Enough Signatures To Petition

Berlin.—An attempt by Communists to hold a nation-wide plebiscite on a law proposed by them saying "it is forbidden to build a battle cruiser of any kind" has failed.

About 2,000,000 Germans signed the Communist petition for a plebiscite on the subject. The constitution prescribes that one-tenth of the qualified voters, or about 4,000,000 persons, must sign a demand for a referendum and therefore no plebiscite will be held.

Sentenced To Three Years

Weyburn, Sask.—Anton Jost, young Hungarian, of Pangman, was sentenced to three years in penitentiary when a jury found him guilty of attempting to murder Mrs. Kauffman and Martin Kauffman. The jury found that Jost was not guilty of wounding Annie Kauffman with intent to murder or do her harm.

Manitoba To Seek Wider Markets For Important Barley Crop

Fuel Tank Found At Sea

Believed To Be From Plane In Which Amundsen Party Perished

Copenhagen.—A fuel tank, believed to have belonged to the French Latham plane, in which Roald Amundsen and five companions are presumed to have perished in an attempt to reach survivors of the ill-fated dirigible Italia, has been found.

The motor boat Kelf arrived at Waldersund with the tank, having found it at latitude 64.52 north, longitude 8.50 east, about 200 miles north of Christiansand, Norway. It was capable of holding 600 litres of fuel but contained only 30.

Oslo, Norway.—Careful inspection of a fuel tank picked up by the motor boat Kelf at Waldersund has revealed two lines written in pencil. The writing, however, is almost illegible because of the action of the sea.

Only the word "Accie—20 X 1" could be deciphered. It is believed that the word "accie" might stand for the French equivalent for accident and that the figures might represent the position of the French Latham plane in which Roald Amundsen and five companions are thought to have perished.

The tank was dented, but otherwise was in good condition.

Scores Liquor Control

Dominion-Wide Temperance Convention Held At Ottawa

Ottawa, Ont.—Reports submitted at the Dominion-wide temperance convention here asserted that the advent of the provincial governments into the field of sale and control of liquor had brought in its wake moral, social, and legislative retrogression. It was also charged that the sale of beer by the glass has revived the old saloon, in a camouflaged form, with crime increasing and other attendant evils.

The convention was held under the auspices of the Canadian Temperance Federation. Delegates were in attendance from all parts of the Dominion armed with reports and documents relating to the liquor situation in their respective provinces. James Hales, K.C., of Toronto, presided.

Offered Appointment

Sir Lomer Gouin May Accept Lieutenant-Governorship Of Quebec

Ottawa.—The C. i. zen publishes the following: "Although he has not officially accepted, it is expected here that Sir Lomer Gouin will respond to the offer of the lieutenant-governorship of Quebec when it becomes vacant next January on the expiration of the term of Governor Perreault. Many months ago the prime minister wrote a letter to the erstwhile minister of justice, expressing the view that he should round off his career by accepting the lieutenant-governorship of the province.

Winnipeg.—A barley research laboratory will be established at the Manitoba Agricultural College, and the provincial government will give the necessary financial assistance in providing every facility for research and the study of marketing problems, according to an announcement made here by Premier John Bracken.

A committee, of which C. H. Burdell, president of the Manitoba Wheat Pool, is chairman, has been organized. It will be known as the Manitoba Barley Research committee. Hon. Albert Prefontaine, minister of agriculture, will represent the provincial government, and Prof. H. C. Grant, of the agricultural college, will be secretary of the committee.

The purpose of the committee is to carry on research and open up wider markets for Manitoba barley. Barley is becoming important as a cash crop to the farmers of Manitoba, and efforts will be made to have better seed sown and greater care taken in the preparation of the soil for sowing.

Manitoba barley has been proved especially good for malting purposes and special efforts will be made to secure greater sales of the crop in the old country. Samples of Manitoba barley will be exhibited this year at the Royal Agricultural Hall in London during the brewers' exhibition.

The decision to establish a research laboratory followed a conference here this week between Premier Bracken, Mr. Prefontaine and Prof. T. J. Harrison, secretary of the National Barley Research committee, and members of the Manitoba committee.

The province of Manitoba produces nearly half the barley grown annually in Canada, and during the past two years has grown more barley than wheat.

Pass Radio Exams

Western Candidates Obtained Certificates Of Proficiency In Telegraphy

Ottawa.—The radio branch of the Department of Marine and Fisheries announce that 18 candidates were examined during the month of September. The following Western candidates were successful and obtained certificates of proficiency in radio telegraphy: Commercial, first class: M. E. D. Jakobson, and J. H. Stow, of Vancouver.

The following have been further examined and have had their existing certificates endorsed for additional equipment: C. Blacklock, Vancouver; A. R. Boek, and W. J. Pickering, Regina, Sask.

Liquor Revenue Helps

Toronto.—The Evening Telegram says that only the sale of \$8,000,000 worth of liquor has saved the Ontario government from facing a deficit on the year's operations, and that a considerable portion of the liquor revenue will go to balance the expected \$2,000,000 shrinkage in the succession duties taxes.

Has Unique Plan To Increase Productivity Of Western Soil

Toronto.—The rehabilitation of the soil of the western provinces through the use of nitrate fertilizer developed by electricity, possibly in Manitoba, is envisaged by Prof. J. Watson Bain, head of the Chemical Engineering branch of the faculty of applied science, University of Toronto.

Addressing the Toronto Electric Club, Prof. Bain said that by passing the component parts of water and air through a simple chemical process, ammonium nitrate, the best and most concentrated fertilizer known, could be produced in unlimited quantities. By the fusion of rock phosphate and coke a compound of phosphorous used in the fertilizing process would result.

"I believe," he said, "that before many years pass we will have to supply fertilizer to the west. They have been 'mining' the ground there in the production of wheat. In Germany, to show how important fertilizers are to Canada, it is not uncommon to produce forty bushels of

wheat to the acre. In Ontario the average production is twelve bushels."

Before many years, Prof. Bain believed, a great plant would be installed in some of the northern rivers running into Hudson Bay, where electric power could be developed. Water would be taken from the river to obtain its hydrogen content and nitrogen would be removed from the air. The two could be united to form the great basic element of plant food. He was of the opinion rock phosphate could be found in the same area and that coke could be freighted in to complete the manufacture of phosphorous in the huge electric furnaces which would derive their heating power from the harnessed waters of the river.

In both processes, Prof. Bain believed, electricity would be used for the heat necessary in breaking up the elements of the mediums used. "It will be a contribution of electric engineering," he said. "It is a field in which we can join hands to produce for the benefit of the country at large."

New Method Of Preserving Fruit

Experiment With Peaches Said To Be A Success

Peaches are a staple crop in Southern New Jersey. To give them a market the year round would mean much to growers, dealers and house-holders. At Hammonton, in the heart of the peach country, Thomas F. MacGregor records a golden experiment with peaches. On August 28 he took a basket of peaches and wrapped each in wax paper. Every dozen peaches he wrapped in wax paper, too. Then he placed his fruit in a metallic container and exhausted its air. Instead of that air he poured in a stream of nitrogen, a wholly inert gas. Mark the result. At the end of a month he opened his container, and found his peaches one hundred per cent. perfect. In ordinary atmospheric air they would have been decayed and worthless.

This experiment is to be thoroughly developed, and with the backing of the famous Franklin Institute of Philadelphia. It seems probable that a new and important art of preservation is within view. It may be feasible to give some fruits and vegetables acceptability for the twelve months of the year. But even to extend for thirty days the prime condition of peaches and pears, lettuce and celery, will mean a priceless boon to market-gardeners and their customers. The process introduced by Mr. MacGregor will probably reduce demands for refrigeration in many a market house. In small households it may abolish the need for refrigeration altogether.

Science Has Reduced Terror Of Leprosy

Dread Disease Brought Within List Of Curable Maladies

Science is taking the terror out of one of the world's most dreaded diseases. Regarded since the dawn of history as a living death, leprosy apparently is being brought within the list of curable maladies, and the leper is being given firm ground for hope.

"Unclean!" the cry of fear, horror and revulsion has come down the centuries. The fear has always been exaggerated to a greater or less degree, but has been none-the-less real in the minds of victims and those about them.

Within the last few weeks, eight patients have been released on probation from the National Leprosarium, Carville, Louisiana, sent back to their homes no longer a menace to the public health. Since the institution was established by the United States public health service seven years ago, 27 have been released, and only one has suffered a relapse. Those released recently had been under treatment from two to seven years, and about 400 others remain.

The Guiding Star

The night was stormy, and the captain's son stood watching his father steering the little vessel. Wishing to consult his chart, the captain said to the boy:

"Here, take the wheel, I'll be back in a few minutes. Steer by that star and you'll be all right." The boy began to steer the vessel, and soon got her out of her course. When the star appeared at the stern instead of ahead, he shouted proudly to his father:

"Come and find me another star, dad. I've passed that one!"

Hissing is not permitted in Parliament. The rule forbidding it "Whoever hissed shall answer for it at the bar as a breach of order and contempt," dates back to 1604.

Sambor: "Say, Rastus, what would you do if you had a million dollars?"

Rastus: "Dey ain't no question 'bout it. I'd have butter and gravy bafe on de same piece of bread."

"Men are all alike. What you say to them goes in one ear and out of the other."

"Women are all alike, too. What you say to them goes in one ear and comes out of the mouth." Buen Finmor, Madrid.

N. W. U. 1756

Potatoes In the Poultry Rations

Cull Potatoes Can Be Used With Satisfactory Results

In the feeding of poultry for market cornmeal is always regarded as having an important place in a mixed ration. Feeding tests at the Experimental Farm, at Ottawa, have proved that where cornmeal is not readily available, cull potatoes can be used very satisfactorily in its place. The test is reviewed in the 1927 report of the Poultry Division, published by the Department of Agriculture, at Ottawa. Two lots of fowls, consisting in each case of fifteen White Leghorns, and fifteen Barred Rocks, were fattened in small pens for a period of two weeks. The mash used was made up of equal parts bran middlings, oat flour, cornmeal, and one-half part of meat meal. This was the ration fed to one of the lots while the mash fed to the other lot contained approximately one-fifth by weight of cull potatoes and no cornmeal. That is to say, the cornmeal of the mash in the one case was replaced in the other by an equal weight of potatoes. The potatoes were thoroughly cooked, mashed and mixed with the other feed. The mixture in each case was fed moistened with milk in the usual way. The value of the mashes used was 2.6 cents per pound with cornmeal, and 2.2 cents per pound with the potatoes. The same amount of feed was consumed by each of the two lots. The gains made were much the same in either case, and the cost of feed varied very slightly. At the conclusion of the feeding experiment the birds were killed and dressed. The potato-fed birds are reported to have made the most attractive dressed fowl. In addition, the birds were submitted to several persons to be tested for flavor, and those receiving the potatoes instead of the corn were pronounced superior in every case. This experiment indicates that cull potatoes may safely be used instead of cornmeal when the latter is difficult to obtain.

An Important Work

Illustration Stations Increasing In Efficiency and Of Value To the Community

Large quantities of seed stock of grain, potatoes, grass and clover seed are distributed from the illustration stations operated under the direction of the Experimental Farms. The quantities sold locally by the stations amounted to 30,942 bushels of seed grain, 11,892 bushels of seed potatoes, and 22,080 pounds of grass and clover seed. The varieties used are those found to do best on the Experimental Farms in the vicinity of the respective illustration stations. Methods of cultivation are also those followed at these larger farms. The seed is multiplied at the illustration stations and offered for sale in the district and in this way bring the improved varieties and methods of growing into general use. The chief superintendent of these stations in his report for last year published by the Department of Agriculture, at Ottawa, says that these stations are increasing year by year in their efficiency as seed growers and distributors due to the care and efforts of the farmers with whom they are co-operating in carrying on this work.

Made Successful Trip

Toy Balloon Crossed Baltic From Sweden To Germany

A toy balloon has made a trip across the Baltic Sea and landed undamaged in Germany. It was sent by a boy from the small city of Hvelinge, near Malmoe, in the southern province of Scania. The lad had tied a letter to the diminutive gas bag giving his name and address and requesting the finder to communicate with him.

A few days later he received a reply from a school teacher on the German island of Ruegan, a distance of about 500 miles, telling him that the good-will messenger had made a safe and graceful landing in his garden.

Canada Club Speakers

Speakers on national subjects will address one thousand meetings of the 120 Canadian clubs from coast to coast during the coming season, it was announced recently at the headquarters of the association, in Ottawa. Last year over a hundred meetings of a similar character were held in Central and Eastern Canada for western speakers.

It requires 100,000,000 miles of wire to run the world's telephones. Of this wire mileage some 8,000,000 are found in North America. Germany with 10,000,000 has the second largest, and Great Britain comes third with 7,000,000. Canada with 3,500,000 is fourth.

Styles by ANNETTE Paris—New York

No. 876—Important Flare.—This style is designed in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust measure. Size 36 requires 1 1/2 yards of 40-inch figured material with 2 1/4 yards of 40-inch plain material.

No. 857—Paris Inspired.—This style is designed in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust measure. Size 36 requires 5 1/2 yards of 40-inch material with 3/4 yard of 1 1/2-inch lace banding.

No. 885—Trim and Slender.—This style is designed in sizes 16 years, 36, 38, 40, 42, 44, 46 and 48 inches bust measure. Size 36 requires 3 1/2 yards of 40-inch material with 3/4 yard of 15-inch contrasting.

No. 418—Attractive and Practical.—This style is designed in sizes 36, 40 and 44 inches bust measure. Size 36 requires 1 1/2 yards of 32-inch material with 7 1/2 yards of banding.

No. 705—Junior Coat With Raglan Sleeves.—This style is designed in sizes 6, 8, 10, 12 and 14 years. Size 8 requires 1 1/2 yards of 51-inch material with 1/2 yard of 27-inch contrasting, and 1 1/2 yards of 40-inch lining.

No. 517—Cunning Bloomer Dress.—This style is designed in sizes 2, 4, 6 and 8 years. Size 4 requires 2 1/2 yards of 40-inch material with 3/4 yard of 15-inch contrasting.

All patterns 25 cents, in stamps or coin (coin preferred). Wrap coin carefully.

Science Aids the Farmer

Losses Of Livestock Greatly Reduced As a Result Of Research

Science now offers a means of eliminating many of the losses of animals which were regarded as inevitable a few years ago. Goitre in sheep, hairiness in pigs and joint-ill in colts, for instance, can all be prevented as a result of recent research. These three things, which exact a heavy toll in Canada each year, never visit the farms where the stockmen feed a little iodine, according to Lionel Stevenson, newly-appointed zoologist for Ontario.

Millions Wanted For Roads

Federal Government Will Be Asked For Appropriation

The federal government will be urged to appropriate \$50,000,000 for the building of new highways and the improvement of existing roads by the Canadian Automobile Association.

In annual convention here, the association adopted a resolution presented by A. B. Mackay, of Calgary, urging federal aid for highway construction, the various provinces to contribute on a 50-50 basis as heretofore.

Sponsored by Duchess of York

Photograph of the newest of the four Canadian Pacific 20,000 ton vessels taken immediately after it had been christened in her own name by Her Royal Highness the Duchess of York. The Duchess of York is seen just before taking the water on the Clyde.

Canada Best Customer Of U.S.

Also Sells United States More Imports Than Any Other Country

Canada led the United Kingdom by more than \$100,000,000 in total trade with the United States during the first six months of 1928, the Foreign Commerce Department of the United States emphasized in a further analysis of the nation's foreign commerce, just given out.

During the six months Canada bought more American exports and in return sold the United States more of its imports, the Chamber said, than any other country. The total business between the two countries was \$661,000,000 compared with \$560,000,000 for the United Kingdom, the second best buyer and third best seller. The statement said:

"Canada with a population of about 9,400,000—somewhat less than that of the metropolitan district of the City of New York—in the first half of this year purchased American goods amounting to \$426,199,000, or 18.1 per cent. of our total exports, thus becoming by far our most important market, having outdistanced her nearest competitor, the United Kingdom, by nearly \$45,000,000.

"Our Canadian neighbors, in displacing the United Kingdom as our best customer, increased their purchases nearly 6 1/2 per cent., buying \$45.70 worth of American goods per capita in the six months. Germany, with a decrease of \$4,541,000 or 2.2 per cent. took \$205,769,000 worth of American goods, retaining the place which it held for the same period of last year as our third best customer.

Record Freight Train

Train Loaded With Wheat Over a Mile In Length

What is claimed to be the longest and heaviest grain train was recently hauled from Sault Ste. Marie, Saskatchewan, by the Canadian Pacific Railway. This train, which is believed to be the record freight train for any class of merchandise, had 135 loaded cars.

The long line of box cars moved between stations, a distance of 25 miles, in 55 minutes. When the engine reached the switch at Arcola the train waggled its tail beyond the mile board in the yards for its overall length was something more than 5,280 feet.

It was, railway officials said, the first loaded grain train of more than a mile in length to operate anywhere in the world.

With 135 loaded box cars, the train had in addition a caboose, a water car and engine. The gross weight was 8,725 tons, and the contents of the cars reached a total of 202,000 bushels, or the produce from 10,000 acres of farm land yielding an average of over 20 bushels to the acre.

In their effort to establish a new record for heavy trains, the railway officials enlisted the aid of nature, taking advantage of a heavy north-west wind to stage the run.

Should Set Example

Clergyman Requested Not To Smoke In Public

Through a resolution passed at the meeting of the Ontario branch of the Women's Christian Temperance Union, held in Toronto, clergymen were requested to refrain from smoking in public, as an example to the younger generation. The motion was made by Mrs. W. Pugsley. It requested that ministers who found it necessary to smoke do so only in private.

Mrs. S. G. E. McKay, North Bay, in addressing the gathering, emphasized the need of electing temperance people to high offices in municipal and provincial governments.

A Persistent Salesman

"Here you are, sir," cried the hawk, extending a bouquet. "Buy some nice flowers for your sweetheart."

"Nothing doing," responded the young man. "I haven't got a sweetheart."

"Buy some flowers for your wife, then."

"Wrong again," was the answer. "I'm not married."

"Well, then, governor, buy the blooming lot to celebrate your luck."

A husband found some holes in his socks, and said, "Wife, dear, why haven't you mended these?"

"Hubby, darling, did you buy me that coat you promised?"

"N-no."

"Well, if you don't give a wrap, I don't give a darn."

Until men found out how to build a true arch, about 2500 B.C., the longest bridge span was about forty feet.

Air Fleet To Carry Troops

Britain Proves New Means Of Transportation Is Valuable

Fifty-seater troop-carrying aircraft are now being designed by British aeronautical experts to replace the 25-seater machines that have been doing excellent work for a year or more in Iraq. The keel of the first of the 50-seaters is to be laid shortly, and from the data gained from the performance of the new machines plans will be laid for the construction of a whole fleet of these new giants of the air.

Although the design of the new machines is naturally an Air Ministry secret, it is understood that they will be of all-metal construction, have central engine rooms like those of an ocean-going liner, and the motors will be so disposed that in the event of one of them going wrong in the air, this will not seriously affect the flying powers of the airplane. In the case of minor breakdowns it should be possible to effect repairs while the machine is still in flight. The seats are to be all of the "tip-up" variety so that the airplanes can, if necessary, be used for the transport of munitions, food, or other materials of war to enable the troops already landed to hold their positions indefinitely.

As in the present 25-seaters, the new machines will be equipped with elaborate devices for radio-telephone communication with headquarters. Including, of course, the hanging airdials for communication while in flight, and telescope masts that can be raised while the machine is on the ground, and through them summon aid in case of a forced-landing, or in case immediate reinforcements are needed to support troops already landed.

Thus instead of tramping weary miles overland, or being jolted in trucks over rough roads, British soldiers engaged in fighting Great Britain's frontier battles, will in the future joy-ride to the battle front at 100 miles an hour as comfortably as if they were travelling in a London bus.

The value of these troop-carriers in quelling minor native disturbances at points far distant from large British camps, it is said, has been repeatedly demonstrated in the past 18 months in Arabia and in Britain's mandated territory in Mesopotamia.

Sherman Was Posted

Did Not Forget Hiding Place In Old Room At West Point

At West Point, the great military training school of the United States, certain customs and conditions never change. A story is told that when General Sherman, after the Civil War made a visit to West Point, an inspection of barracks was made. The two cadets who occupied a certain room sprang to "attention." Sherman saluted, as is the custom, and then said drawlingly, "Any contraband in this room?" When neither of the cadets replied the General, with a smile on his face, stooped down before the fireplace and reaching up, removed a loose brick. Putting in his hand, he drew forth several cigars. This was in the days when no smoking was allowed. "Thought so," said the General, "I used to hide 'em there myself." It was Sherman's old room. The General didn't report the find.

King George Has New Car

The King has just acquired a new car, his fifth in 20 years. The royal cars are so carefully kept that they are fit for duty when other people's are on the scrapheap after a year or so. The new car is "all British," with a "double six" engine, and is painted with the usual dash of dark crimson. On the King's cars there are no number plates, only a purple light on top, which indicates to the police who goes by.

"Drove to New Rochelle yesterday in three hours."

"Boy. That's saving time! What did you do when you got there?"

"Come back in two hours and forty minutes."

"What are you reading?"

"What the critics have to say about my last burglary."—Jugend, Munich.

CHAPTER IV.—Continued.

An appearance the champion very much resembled an ape. His bullet-like head was close cropped. The small piggyish eyes were deep set under overhanging, beetling brows, and the nose was flat like a negro's. His lips were thick, with a repulsive twist that gave his face a sinister look. His massive jaw was purposely left unshaved to rasp the tender skin of his opponent's shoulders in the clinches. His enormous barrel-shaped chest was covered with a thick growth of hair. His shoulders were broad and his disproportionately long arms, heavily muscled, terminated in two thick ham-like hands. He gazed confidently at Donald's corner.

A pasteboard box containing the gloves was tossed to the centre of the ring. There was a stir as the announcer pushed his way through the ropes. Andy crossed the ring to examine the champion's hands for tape and to test thoroughly the new gloves for any trace of sewed in shot or lotion that would cause the eyes to smart. One of Garriau's seconds was making a similar examination in Donald's corner.

A big man in a wide-brimmed hat, with a mackinaw coat over his arm, came walking down the steps of the arena. The look of astonishment on his face gradually gave place to one of joy. He ran to the ringside. "Donald!" he shouted joyously, as he sprang through the ropes. With a thrill of pleasure Donald held out his hand to Jack Gillis. The big man's face was beaming. "Just got in," he said. "Bin lookin' all over town for you! I come to the fight and—holy mackerel!—here you are one of the fighters!"

Andy noted the glad look in Donald's eyes and he spoke sharply to Donald's seconds, who were for ordering the boisterous visitor out of the ring. The word "psychology" was foreign to Andy, but he knew that Donald's mind had for a moment drifted away from the fight. Donald was surprised to see Douglas greet Gillis warmly as the big man left the ring.

"I have two good friends in the audience, anyway," whispered Donald to himself.

Andy leaned over him, talking in a low voice, giving him comfort and

advice. "I'll try right along, Donnie, to get your goat by cursing and using vile language, but don't listen 'im, and don't lose your temper. 'E fights with 'is chin tucked in the 'ollow of 'is left shoulder and 'is neck muscles rigid. It's mighty 'ard to land on 'is jaw with a right. Now the first round," Andy went on. "you just jab 'im light with your left; don't 'it 'ard, just a good snappy punch. 'E'll think you 'ave no sting in it, and the next round 'e'll get careless and let you 'it 'im so 's to get a punch. Of course, if you see a good opening, let fly with all you 'ave, but 'e won't open up until 'e tries you out a hit. Watch the dirty blighter in the clinches; 'e'll foul you if 'e gets a chance. Another thing: this is to be twenty rounds, so lyke your time. Now is everything clear to you, Donnie?"

"Yes, Andy."

Andy patted Donald's bare shoulder affectionately.

The contestants stood in their corners as they were introduced. The referee beckoned them to the centre of the ring for instructions. As Donald slipped the enveloping bathrobe from his shoulders and stepped forward, a murmur of admiration swelled from the crowd. His lean loins and broad shoulders showed to advantage in the bright light. The long, flowing muscles rippled under his skin when he moved, like those of a panther. Loud applause came from all over the arena. Garriau, thinking the ovation was for himself, turned and ducked his head with a motion that was intended for a bow.

A rough voice near the top shouted: "Aw! that wasn't for you, you big stiff!"

The judge and the dentist turned and looked at each other. The eyes of the latter seemed to say, "I told you so." The judge smiled and nodded.

A fat man, who could not have been more than thirty-five years of age, yet with rolls of fat at his waist-line, a bulbous nose and florid face, bit savagely on a big cigar. "By gad!" he ejaculated, "that man is perfect." There was a look of admiration and envy in his red-rimmed eyes. Thus do men admire the strong, well-kept body of the athlete, even though their own physical self has degenerated to mere paste. "Two to one that Garriau wins inside of ten rounds!" shouted a voice. Douglas covered the bet at once.

"Now, men," instructed the referee briskly, "this is to be twenty rounds. You are to fight clean breaks. You can hit with one arm free, but you cannot hold with one and hit with the other. When I say 'Break' I want you to break at once and step back. Do you understand fully? Good! To your corners."

Donald glanced at his friends, who sat with their eyes upon him. He felt Andy's hand upon him gently stroking his arm, yet he could not suppress the trembling in his limbs. "Everything's all right, Donnie," whispered Andy softly.

The gong rang. Garriau assumed the crouch Andy had predicted, his chin resting in the hollow of his shoulder, his eyes seeming to retreat into his skull under the overhanging brows. This was the champion's famous "fighting face."

"Pretty boy, ain't yer?" he scoffed. "I'm goin' to knock dose pretty teeth down yer throat, you—" he cursed. Donald snapped a light left to the ugly face and danced out of range. The champion's thick lips parted in a fiendish grin. "My, mamma's nice boy has a terrible punch!" he derided.

Donald continued his dazzling footwork, keeping the champion in pursuit and contending himself with occasional left-hand jabs that kept his opponent's head rocking. He shot glances at intervals to his corner for instructions from Andy, who nodded his head in approval of his tactics.

The round finished in the challenger's favour by a wide margin on points. The champion had not landed a single effective blow during the round.

The action of the first round caused Donald to forget his nervousness. Andy crowded between his knees and gently massaged his body, all the while speaking words of commendation and counsel.

"Now that you find that you can reach 'im easily with your left, watch me for signals. If I see that 'e's openin' up, I'll give you the sign to shoot your left with all you 'ave. If he swings again with 'is left, try for 'is broad basket. You understand me, Donnie?"

"Easiest thing I've picked yet," chuckled the champion as he came to his corner.

"He may be stalling," cautioned his evil-faced manager.

"Huh!" grunted the champion. "I can take all he has in dat left and never feel it. I'm goin' to open up on him de last part of de next round."

The gong rang for the second round.

Her Color Went Black. She Was Frightened To Death

Mrs. Waite, New Brighton, writes: "That deadly indigestion and gastritis, caused by constipation made my color go black. I was frightened to death, and I feel your laxative saved my life. I take them every night now for precaution, and do not fear an attack of constipation poisoning any more."

CARTER'S LITTLE LIVER PILLS
All druggists—25c and 75c red pkgs.

Donald caught a glimpse of Purcell's face as he crouched in the opposite corner. Such a look of vicious hate shot from his one gleaming eye that Donald shivered.

The rough element began to boo Donald for his running tactics. Some fans feel that they are being cheated out of the price of admission unless they can witness the spectacle of two boxers slugging toe to toe until one goes down. Science counts for nothing with this small minority.

"Whadda ya think this is, a marathon?" they shouted.

"Powder-puff punch!" derided another.

Garriau suddenly tore in, letting loose a terrific right that would have stopped the bout right then if it had landed. From a clinch Donald looked to his corner. Andy went through the pantomime of shooting a straight left. Donald nodded.

"Powder-puff punch!" again shouted the disgruntled fan.

"Did ya hear that?" hissed Garriau, twisting his mouth into an apish grin. "Yo can't hit hard enough to break an egg. I'm goin' to fix dose teeth for you now." He leered brutally as he tore after Donald, disdaining the belittled left.

Donald stopped abruptly in his flight and shot a lightning left across to his pursuer's jaw. The champion saw it coming, but too late to block it. He threw his body into reverse, robbing the blow of a great deal of its force; yet enough was left to send him reeling back to the ropes, his head whirling and his knees wobbling. With a roar the spectators came to their feet as one man. The gong saved Garriau.

The crowd gave Donald a deafening ovation as he walked to his corner. He looked for his friends and saw Douglas and Gillis locked in an embrace and dancing madly in the narrow aisle.

(To Be Continued.)

A LAUGHING BABY

IS A GREAT JOY

What can give more joy in the home than a laughing, happy baby. The well child makes everyone happy with his tuneful gurgle and bright laughing eyes. It is only the sickly baby who is not a laughing baby, for it is the little one's nature to be happy when well.

Mothers, if your baby is cross, if he cries a great deal and no amount of attention seems to make him happy, give him a dose of Baby's Own Tablets and he will soon be well, and ready to radiate that happiness through the home again.

Baby's Own Tablets are a mild but thorough laxative. They regulate the bowels and, sweeten the stomach and thus banish constipation and indigestion; break up colds and simple fevers and correct those troubles which accompany the cutting of teeth and in doing those things—and doing them well—they make baby happy and keep him happy. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

"And how do you get on with your wife?"

"I've a splendid working arrangement with her. In the forenoon she does what she wants, and in the afternoon I do what she wants."

TOOTH DECAY

You do not allow your child too many sweets lest they spoil his teeth, and, wisely, you did not let him know their taste too early. But where the harm?

Now, as you have read, no doubt, so called tooth decay is a disease that is incited by bacteria. These micro-organisms have the power of setting up fermentative processes in left-over carbohydrate matter in the mouth, producing acids which attack the tooth substance to dissolve it. In this manner, these organisms gain access through the hard enamel covering.

You perhaps did not suspect the presence of bacteria in your mouth, did you? Yet, a noted authority states that more than a hundred different species could undoubtedly be isolated from a single mouth at one time or another.

Now, of course it is neither practicable nor possible to cut off the carbohydrate food supply, nor to rid the mouth of bacteria for any length of time.

However, nature herself is not wholly defenseless against the situation, for the acid formed is, as a rule, taken up by the saliva and dissipated before it can do injury—excepting where it can lie undisturbed as in deep pits or fissures, or beneath food particles that adhere to the tooth, when proper mouth toilet is not observed.

But you must do your part by avoiding excessive use of carbohydrate foods such as sugars, starches and allied substances, for the use of a too liberal supply of these is to create a condition that can but invite disaster—especially when proper mouth toilet is not the daily rule.

First Parachute Was Used By Frenchman

Successful Drop Made From Considerable Height In 1802

Unquestionably the parachute, nearly in its present shape, is as old as aeronautes. There is supposed to be a picture of one in Venice dating from 1617, and there is a narrative of a French ambassador to St. Petersburg in the 17th century, to the effect that a mountebank at the royal court climbed to the top of a tall bamboo and jumped off with two umbrellas to support him. Very likely this is true.

Shortly after the Montgolfier ascents, the French aeronaut Blanchard seems to have made the first parachute experiment in connection with a balloon, but instead of trusting himself to the apparatus he attached his dog.

Possibly because the parachute had been designed for the weight of a man and was thus much too large for the dog, instead of dropping when released, it went up considerably higher than the balloon, then at about 6,500 feet. After a time it came back down near the balloon and the dog got a chance to bark a greeting to Blanchard. At least, that's the yarn that comes to us. Finally Blanchard reached the ground by the gradual descent of his balloon and a little later the dog landed unhurt.

This successful experiment doubtless greatly stimulated the inventors for presently various forms of parachutes were suggested, some of which were actually constructed, and among them some fearful and wonderful arrangements. One of these promptly folded up when released and resulted in the death of its inventor. After this it appears the designers returned to the original umbrella form.

The first successful drop from a balloon at any considerable height appears to be that of the Frenchman, Garnerin, who staged a performance at Paris in 1802. Garnerin cut himself loose at 1,200 feet and luckily managed to land safe and sound.

The Middle Course

During his visit to a village school a diocesan inspector of religious knowledge put this question to a class of little girls:

"If all the good people were white and all the bad people black, what color would you be?"

Some answered "White" and others "Black." But little Mary replied: "Please, sir, I would be streaky!"

No need to suffer with corns, or to run the risk of paring them. Remove them surely and painlessly with Holloway's Corn Remover.

Mistress: "I see that another soldier has called for you, Mary. I thought you had only one sweet-heart!"

Cook: "Oh, no, mum; two. You see, one's regular and the other's a reserve."

Minard's Liniment for sprains.

"Did you hear about the defacement of Skinner's tombstone?"

"No, what was it?"

"Someone added the word 'friends' to the epitaph."

"What was the epitaph?"

"He did his best."

Trying To Eliminate Hazards Of Submarines

U.S. Navy Will Make Test Of Rescue Apparatus

Stirred by undersea craft disasters that have taken the lives of scores of American officers and men, the navy is making strenuous efforts to eliminate the hazards of submarines by devising and perfecting rescue apparatus.

Many experiments are being made and plans carried out for exhaustive tests to learn what happens when a submarine is stricken below surface. No man has survived a submarine accident wherein the craft was totally disabled and flooded while under water, and none has been able to tell just what occurs under those conditions.

In addition to laboratory experiments, the hulk of the submarine S-4, which took 40 men to their deaths after she was rammed by the Coast Guard destroyer, Paulding, off Provincetown, Mass., December 17, 1927 will be used in rigorous tests off Cape Charles, Va., in October. These tests are to be conducted by Lieut. C. B. Momsen, submarine expert and diver.

Attempts will be made to learn conditions that exist during the wrecking of undersea craft and devise methods of counteracting and preventing them. Naval divers will be placed beside the hulk which will be sunk and flooded. They will then escape through hatches and come to the surface by using the navy's new breathing device, "the lung," and other rescue apparatus developed during the last few months.

The singing Memnon was a statue in Egypt which gave out musical notes when the sun rose in the morning and as it set at night. After the statue was tipped over it no longer sang.

Excited Person (complaining to postmaster): "And if I don't get better service, I shall give my postal business to someone else."

Headache? Relieve with Minard's Liniment.

"Have you anything to say, prisoner, before sentence is passed upon you?"

"No, your honor, except that it takes very little to please me."

Little Helps For This Week

"Let us therefore come boldly unto the throne of grace, that we may obtain mercy, and find grace to help in time of need."—Hebrews iv. 16.

Of what an easy, quick access, My blessed Lord, art Thou! how suddenly

May our requests Thine ear invade! To show that state dislikes not easiness.

If I but lift mine eyes my suit is made; Thou canst no more not hear than than Thou canst die.

—George Herbert.

Prayer is a key which, being turned by the hand of faith, unlocks all God's treasures.—Hannah More.

Relieves Asthma At Little Expense. Thousands of dollars have been vainly spent upon remedies for asthma and seldom, if ever, with any relief. Dr. J. D. Kellogg's Asthma Remedy, despite its assurance of benefit, costs so little that it is within reach of all. It is the national remedy for asthma, far removed from the class of doubtful and experimental preparations. Your dealer can supply it.

Unusually Rapid "See that large building on our right?" said the booster to the visitor he was showing round.

"Yes."

"Did you notice it was on our left when we came down town?"

"Yes."

"Well, that gives you some idea how rapidly our city changes."

The Dangerous Age

What is the most dangerous age of a person in respect to accidents? According to the Workers' Compensation Commission, at Sydney, N.S.W., a person of 20 years is in the greatest peril. From that age the accident rate decreases and the safest age is set down at 75 years.

EVEREADY Layerbilt
There's been a revolution in the science of battery building—Eveready has found a way to give you more battery for your money than you ever bought before!
The new Layerbilt principle can be understood by anyone. It simply gives you more current-making elements by packing flat cells like crackers in a box, instead of using many round cells with waste space between.
You actually get the equivalent of a much bigger battery and, of course, it takes much longer to use it up. That's why you should buy Eveready Layerbills and save money. Now selling at new low prices. Ask your dealer.

Armistice Day

The Raymond Women's Institute feel that they owe an explanation to the public for cancellation of the annual Armistice and Thanks giving dance. Every since the Armistice was signed the Women's Institute have taken the initiative in commemorating this day by selling poppies for the War Veterans' Association and by giving a dance. This year the Opera House was secured and all arrangements made for the dance, when suddenly the Institute was informed that the Chautauqua was coming on that day and that they had the perfect right of way. The Institute feel that it is hardly right that a permanent local organization should be forced to step aside and forego the usual commemoration of a day as important as this one, to give this day to an out of town association. The Institute is hoping that the Opera House board of directors and the management are loyal enough Canadians to see that local organizations, in the future, are not forced to give way to outside associations when commemorating national holidays.

The Raymond Women's Institute Board.

Saturday, November 10 is "Poppy Day" in Raymond. The local W. I. will sell the poppies as usual.

Mr. Chas. Asplund, of the S. of A. staff, left this morning for Calgary in the interest of the Pig Club work. He was accompanied by the local Pig Club judging team composed of Misses Lenore and Wyora Scoville and Mr. L. Piepgress. This team will compete for district honors.

The Athenian Club members were the guests of Mrs. R. Witbeck last Wednesday evening at the home of her daughter, Mrs. C. E. Grey.

A. W. Shackelford, manager of the Majestic and Palace theatres at Lethbridge, was a guest at the Capitol theatre last Friday night. He repeated the phrase used by Mr. Barber, "it is a model theatre".

Col. J. S. Dennis, chief commissioner of immigration and colonization visited the local sugar plant last Saturday. He expressed surprise at the size of the industry as indicated by the great number of beets in the sheds. He spoke of the big part the sugar industry would play in future colonization schemes.

An occasion such as Charlie Chaplin comes but once in a long time, so step out tonight with the entire family and see him in "The Circus". Matinee Saturday at 2.15.

The M Men of the first ward are taking the initiative in a movement to put the skating rink in condition for the winter sport, before cold weather makes it impossible. Next Saturday at 2.30 is the time set to do this work, and the assistance of everyone is solicited.

IS Musical Education Dispensable?

The town of Raymond has been stirred and alarmed by the report that one of its most brilliant and respected teachers is leaving his post in the school system for want of that moral and financial support to which he is entitled.

It is often the case that prophets are without honor in their own country, but surely no one in this community is blind to the exceptional service and talent which has been freely devoted to the musical training of our boys and girls for many years past.

It may be argued that music as a form of education may be neglected in a school system. Such an argument is a lapse back to the primitive, for nowadays every stress, in the modern school system, is given to adequate musical training.

Enquiry among pupils and teachers show that in every grade, and among all sizes and ages, the music period in our school classes, has been most keenly enjoyed and participated in by the students. It has provided the most splendid form of change and relief in the program, giving the classes new inspiration and energy to attack their other work.

Raymond for the past ten years or more has had the enviable position of leading practically every town and village of the province in the musical training of its young people. We cannot afford to stint our school director of music that he must leave the schools and give up his life's vocation.

This is the situation in a nutshell. The school board aims to keep expenses to a minimum. If slight increase in taxes is asked, people say no. Now things have shaped themselves into an issue. We cannot afford to let Mr. Mitchell go. But unless we are prepared to appreciate and pay for such services it will be lost to us completely and our loss will result in gain to others.

Harvest is drawing very near to a close and farmers will be in a position to spend more time at their leisure, so members of the Board of Trade, let's get busy again. "Every Man a Member" should be our aim.

The School of Agriculture opened last Tuesday with about 50 students in attendance, and 20 more are expected in within the next two weeks.
